Homeopathy

for

Warts / Corns

HomeoConsult R&D

Recommended for:

Completely curing wart & corns from within – Checks viral activity responsible for the warts – No scarring – No discoloration – 100% safe for children

Without any side effects

Chief Consultant: Dr. Anish Vaknalli

BHMS (Bom), AMRSH (UK), ASPT (USA),
HomeoConsult R&D (MD)

Beware...

- ❖ Warts & molluscum are caused by a **virus** and cannot be treated only with local applications
- ❖ Repeated or multiple warts & molluscum occur due to **spread** of the virus
- ❖ Poor **immune** response usually results in multiple warts
- ❖ Occasionally warts may disappear without treatment, however the virus may **persist**
- ❖ Warts & molluscum tend to spread by contact and should be **treated**

As a result...

Local applications (salicylic acid), cryotherapy (freezing), cauterization (burning), electro-surgery (electric current) and laser therapy work only temporarily or superficially and **do not guarantee any long-term solution**.

Stop worrying...

HRD's Homeopathic treatment can help you get rid of the warts, corns & molluscum and minimize / prevent reoccurrences. Our specialized Homeopathic treatment has cured **thousands** of cases over the past 25 years with the benefit of preventing relapses. The medicines will **harmonize** your immune response, improving your body's ability to **fight** the virus. Your body will also recognize the wart or corn as a foreign body and **expunges** them from within, unlike the above mentioned therapies.

Benefits of HomeoConsult R&D treatment:

- ❖ Boosts your immune response and thus fight the virus
- ❖ Expunges the wart from within without leaving any scars
- ❖ Does not cause any discoloration as commonly caused by acids

- ❖ 100% safe for children and adults as this treatment has no side effects
- ❖ Only internal homeopathic medicines and local softening (homeopathic) creams used

Homeopathic Treatment outcome:

There are numerous remedies in homeopathy which help warts. If the wrong remedy is chosen the wart or Molluscum may never respond and the virus never eliminated. It is empirical that we study and take into consideration the nature of the wart; the location, size, your body's immune status, the individual's age and rate of spread of the virus.

After considering these factors the indicated Homeopathic remedy is prescribed for a period of 3-6 months. This duration is usually sufficient to **bring about softening of the wart & corn, removal of small and superficial warts, eliminate Molluscum and reduce the spread of the virus**. Large and deep rooted warts & corns may take longer as the medicines are naturally helping your body fight this condition. However on completion of the treatment you will have **minimized the chance of a reoccurrence**, evident from the thousands of cases treated at the centres.

Warts/Corns/Molluscum: What are they?

Warts: What are they?

Warts, or verrucae are benign growths or tumors caused by a **virus** and appear on the skin or the mucous membrane. The virus responsible is the human papillomavirus (HPV). They affect people of all ages but most commonly appear in children and teenagers. They appear on the hands, arms, legs, face, feet and even the genital area.

They spread by direct contact, simply by touching the wart. The virus usually enters the body through an area of skin that is peeling or cracked.

Clinical studies show that a poor immune response makes a person susceptible to this condition. Your ability to recover from this condition and **prevent relapses** also depends on your immune status. It is therefore empirical to opt for homeopathy, rather than local creams/ointments, as the medicines prescribed will help boost your immune response and fight the virus internally.

Corns: What are they?

Corns (Callosities) are horny indurations or thickening of the skin resulting from longstanding **pressure or friction**, or both.

Corns on the soles can be very painful. Very often the pain can alter a person's gait and may make walking unbearable. **Homeopathic medicines do relieve this pain rather quickly and help soften the induration. Overtime, the corns will decrease in size and the tendency for recurrence or multiplication can be minimized.**

Molluscum Contagiosum: What are they?

These are benign, **viral** (DNA virus or poxvirus) skin eruptions appearing in the form of by small globular, waxy, umbilicated epithelial (superficial skin lining) tumors. They contain a semi-fluid, caseous matter which usually turns solid overtime.

Molluscum affects all age groups and is commonly seen in children and individuals having a lowered immunity. They tend to spread by contact and a person may have multiple Molluscum due to spread of the caseous matter within the Molluscum.

Homeopathy works wonders in curing this ailment.
